FOR IMMEDIATE RELEASE

HPI RECEIVES CONTRACT TO COMPLETE LNG CONTROLS UPGRADE
International Rotating Equipment Solutions Provider Selected to Complete Work for a
Des Moines, Iowa Liquefied Natural Gas Plant

HOUSTON (July 20, 2017) – HPI announced today that it has been selected to complete a second Liquefied Natural Gas (LNG) controls upgrade for a Des Moines, Iowa-based energy company.

The project will enable the client to modernize their obsolete control system, which will greatly improve their system automation, diagnostics, functionality and ease of operation. The project will also establish a common control system across each of their LNG Plants to further improve plant control.

The first phase of the project began this past May, and is estimated to be completed by September 2017. The second phase of the project is on schedule to be completed in December 2017.

This LNG controls upgrade project is one of a number of projects recently awarded to HPI by the same large energy company, including controls upgrades to several gas turbine generators.

HPI President and CEO, Hal Pontez, is pleased with the company's continued upward trend.

"This award is the result of a long history of providing quality service and custom-engineered solutions that reduce lifecycle costs of diesel, gas and steam turbines utilized in the power and oil and gas industries. We look forward to working with our client to provide them with a solution to continue to efficiently operate their LNG assets."

ABOUT HPI

HPI is an international rotating equipment solutions company, with worldwide resources and four core lines of business: Engineering, Procurement and Construction; Operations and Maintenance; Cyber Security and Compliance; and Maintenance, Repair, Overhaul and Controls. We provide a range of engineering, maintenance management, industrial diesel and gas turbine overhaul, and repair and field services. Our services provide customers with custom-engineered solutions that reduce lifecycle costs of diesel, gas and steam turbines utilized in oil and gas, power generation and marine applications.

For 14 years, HPI has continued to grow and has been on Houston Chronicle's "Leading Companies" lists since 2012. For more information please visit [**www.hpienergy.com**](http://www.hpienergy.com).
