FOR IMMEDIATE RELEASE

HPI AWARDED CONTROLS UPGRADE PROJECT FOR THE OCEAN COUNTY UTILITY AUTHORITY, NJ
Houston turbomachinery solutions provider chosen to complete work for two Ocean County Utility Authority (OCUA) Water Treatment Plants

HOUSTON (August 7, 2017) – HPI announced today that it has been awarded a contract to complete the controls upgrades for six Waukesha cogeneration engine units at two Ocean County Utility Authority (OCUA) water treatment facilities.

The completion of this project will enable OCUA to fully automate their Waukesha engines and greatly improve their system diagnostics, functionality and ease of operation. This control upgrade will also allow OCUA to add these power generating systems into their plant DCS in the future, allowing them to control the entire plant from a central location.

Scheduled to begin in May 2017, the project is estimated to be completed by March 2018.

This marks another high profile project awarded to HPI, which recently received contracts to complete a turbine controls upgrade for one of the world's largest mining companies and an LNG controls upgrade project for an energy company in Iowa.

"The quality of our work, the dedication of our people and the trust of our clients have afforded us this opportunity," said HPI President and CEO Hal Pontez.

He continued, "Through this project and others we will continue to lend our expertise in providing custom-engineered solutions, and further demonstrate why we are a leading international provider of turbomachinery and control system solutions."

ABOUT HPI

HPI is an international rotating equipment solutions company, with worldwide resources and four core lines of business: Engineering, Procurement and Construction (EPC); Operations and Maintenance (O&M); Cyber Security and Compliance; and Maintenance, Repair, Overhaul and Controls. We provide a range of engineering, maintenance management, industrial diesel and gas turbine overhaul, and repair and field services. Our services provide customers with custom-engineered solutions that reduce lifecycle costs of diesel, gas and steam turbines utilized in oil and gas, power generation and marine applications.

For 14 years, HPI has continued to grow and has been on Houston Chronicle's "Leading Companies" lists since 2012. For more information please visit www.hpienergy.com.
