

HPI RECEIVES CONTRACT FOR A SCADA INTEGRATION PROJECT
*International Rotating Equipment Solutions Provider Selected to Complete Work for Pan-Am
Generating Ltd. at their La Chorrera Plant in Panama – Central America.*

HOUSTON (August 23, 2017) – HPI announced today that due to the successful installation of the SCADA System and controls system upgrade for 6 Wartsila generator packages at Pan-Am’s La Chorrera plant in 2013, it has been selected to integrate 3 new Wartsila generator packages and Balance of Plant into the existing SCADA platform.

The project will integrate the supervision and operations of the 9 generator packages with the same look and feel and common environment enabling the client to monitor the systems more effectively, and provide for better reliability of the power plant. This integration also permits the client to achieve higher levels of efficiency through the inclusion of new signals enabling calculations for more accurate fuel consumption.

Scheduled to begin in August, the project is estimated to be completed by November 2017.

This SCADA integration project is just another of several projects recently awarded to HPI in North, Central, and South America.

HPI President and CEO, Hal Pontez, is pleased with the company’s continued upward trend.

“We keep expanding, not just in the US. but the rest of Central and South America, and look forward to providing our clients with the impeccable quality and service for which HPI is known. We look forward to working with Pan-Am Generating Ltd. to provide them with solutions to continue to keep improving their control systems.”

ABOUT HPI

HPI is an international rotating equipment solutions company, with worldwide resources and four core lines of business: Engineering, Procurement and Construction; Operations and Maintenance; Cyber Security and Compliance; and Maintenance, Repair, Overhaul and Controls. We provide a range of engineering, maintenance management, industrial diesel and gas turbine overhaul, and repair and field services. Our services provide customers with custom-engineered solutions that reduce lifecycle costs of diesel, gas and steam turbines utilized in oil and gas, power generation and marine applications.

For 14 years, HPI has continued to grow and has been on Houston Chronicle’s “Leading Companies” lists since 2012. For more information please visit www.hpienergy.com.
